

	Internal Representation
<b>Ingredients</b>	<p>List.</p> <p>Each element is a list containing the (1) quantity, (2) measures, and (3) food for each ingredient.</p> <p>The quantity was extracted using a regex, measurement by a word bank of common measurements, and food the rest of the item in the parsed ingredient</p>
<b>Tools</b>	<p>List.</p> <p>Each element was a tool identified via a keyword from the recipe instructions.</p> <p>We identified these keywords by using a word bank of common cooking tools.</p>
<b>Methods</b>	<p>List.</p> <p>Each element was a method identified via a keyword from the recipe instructions.</p> <p>We again identified methods by searching for keywords from a word bank of cooking methods.</p>
